

# GRAPHICS RESOURCES TOOL

## Designing Made Quick and Easy

Use this tool to make really cool graphics for your marketing video and your business. Start creating 3D images for your ebooks, offers, etc. which will form the basis of your graphics for course content and bonuses in the video. Post at least 1 to 2 graphics in the Private Facebook Group when you are done. Stick to it until you are through it.

# Cool Graphics

## Where to find 3D Images, 3D Boxes, Composite Mock-ups for your video

- The Resources Tool will have Clickable Links with free and pay-to-play resources
  - I encourage you to take the next few days to explore them, and
  - Design your e-book covers, course covers, 3D mock-ups for your action guides, modules, learning modules, audio series, streaming sites, courses, etc.
  - Custom design any gift certificates, invites, percentage off, freebies, etc. that you may add to your bundle.
  - Get creative with what you see. Even if you are not ready yet to design anything, you should still spend 15-20 minutes exploring these sites so you get the creative juices flowing and jot down what you might want to create with irresistible offer and bonuses. The more you do this, the easier and faster it gets.
